

Payments Driving The Digital Transformation

Changing Consumer Behaviours - New Technologies - Regulatory and Legal Challenges

2019 European Payment Summit
Co-Host: The Hague

Returning to The Hague on 25-26th April 2019, the 17th edition of The European Payment Summit (EPS) will provide attendees with vital information and guidance on the major issues and trends currently affecting the global payments industry. We will assess the regulatory landscape and its efforts to keep up with all the latest developments in technology, with keynotes focusing on how we align global issues such as risk management and security. We will also look at emerging payment technology and platforms and how they can enable and empower the unbanked in remote regions such as Africa.

The unique 2-day program will also feature key developments in open banking and the transformative effect emerging technologies such as AI and IoT may offer for AML and Cyber Security. Special break-out sessions will offer a deep-dive into specific areas of payments such as ticketing, the future of cards in the face of mobile wallets, and the real opportunities presented by cryptocurrencies beyond the hype. Best practice initiatives will be offered by international thought leaders from the payments industry via interactive keynotes and panel sessions, and analysis and guidance will be offered from regions and jurisdictions taking trailblazing initiatives in payments.

The event will also feature The Hague Security Delta (HSD). HSD is the largest security cluster in Europe. In this cluster institutions work together on innovations and knowledge in the field of cyber security, national and urban security, protection of critical infrastructure, and forensics. HSD has partnerships and create knowledge bridges with the main global security clusters in the USA, Canada, Singapore and South Africa, next to having strong ties to the main European security regions and Brussels. They share a common goal: creating a secure world and transaction space.

As a payments professional these 2 days of peer-to-peer learning and networking offer you the chance to make important new contacts and devise new strategies that will make a difference to your organisation.

Join us in The Hague in March and feel free to share your programme ideas and suggestions in advance!

Day 1 - 25 April 2019

08.00 Welcome Coffee & Registration

09.00 Introduction by Summit Chairman

09.15 Welcome to The Hague

09.30 Keynote Panel Debate with Q&A

Payments Driving The Digital Transformation
From transactional necessity to business enabler
